

THREE-DAY INTERMEDIATE LANDSCAPE DESIGN PROGRAMME **OUTCOMES**

This course equips you with a clear mandate as to what design is all about and provide you with the basic principles of design so that you have an understanding of garden layout and structures together with how to combine plants together.

COURSE OBJECTIVES:

- To teach the basis of good garden design, including surveying, working to scale and drawing.
- To encourage participants to determine the style they really want and which will suit their lifestyles
- To teach garden design principles and the use of architectural and informal shapes plus the importance of hard landscape structures;
- To impart invaluable, time-saving tricks of the trade;
- To explain how to prepare an outline scheme to formulate one's ideas;
- To showcase African design trends;
- To impart all this in an interactive manner accompanied by numerous colourful slides and a comprehensive plant list with live examples.
